

EDUCATION CENTER

Congratulations Class of 2014!

Looking back to 2014 we celebrated the graduates from the Highway, Carpentry and Ironworking Divisions. Their hard work brought them their Journey Persons certificates, credits from HACC towards an Associates Degree in Technology Studies, and the satisfaction of completing another step in their construction career. Kevin Brothers completed his Highway Apprenticeship. Nicholas Logue, Preston Ortmyer and Brady Rodkey completed their Carpentry Apprenticeship. David Glessner, Justin Miller, Wayne Miller, Michael Raab and Andrew Rinehart completed their Ironworking Apprenticeship. Congratulations graduates!

At the closing ceremony our

apprentices take the opportunity to recognize and thank their mentor - that special someone who has taken the time to guide, advise, and support them as they worked toward this goal. This year Tim Kinsley, V.P. of Development representing Kinsley Construction, and our graduates honored Jed Smith, Building Division Foreman, as "Mentor of the Year" for his dedication to their efforts. Jed's patience and expertise provided invaluable guidance in any assignment undertaken. Thank you, Jed Smith, for your commitment!

In 2015 we embark on the 15th Kinsley Construction Apprentice school year. There is a frenzy of activity as the new class of apprentices is forming. Applications

into the program are evaluated, interviews and testing are scheduled, and before long, a new year of training begins.
